

NeoLoad

Performance Testing Platform

Performance Testing Gives You a Competitive Edge

Align with Agile and DevOps processes for greater testing coverage and reliability under load

NeoLoad's exclusive technology allows you to perform load and performance testing more quickly, efficiently and frequently, which means you can confidently deploy your internet, intranet or native mobile applications no matter which architecture they use. With NeoLoad, simple tasks are automated, and difficult tasks are made simpler.

► **Test with confidence:** Cover more test case, ensure professional grade quality, make testers trusted partners

► **Support Agile:** Make performance testing a key element of your Agile software delivery processes

► **Achieve DevOps:** Make performance testing a continuous process across Dev, QA and Ops

WHAT NEOLOAD DOES

Automated Performance Testing

- Integrate with your Continuous Delivery pipeline
- Automate test scripts maintenance
- Automate correlation, parametrization and randomization

Scale Load Testing

- Up to millions of Virtual Users loading your application
- Hybrid cloud and/or on premise load generators
- Load Generators up in seconds from 70+ geo-locations

Mobile Performance Testing

- Record any mobile application
- Mobile network virtualization
- Measure end user experience on mobile device

Unmatched Test Realism

- Simulate the most complex user behavior
- Supports the latest web and mobile technologies
- Geo-realistic tests from 70+ cloud locations

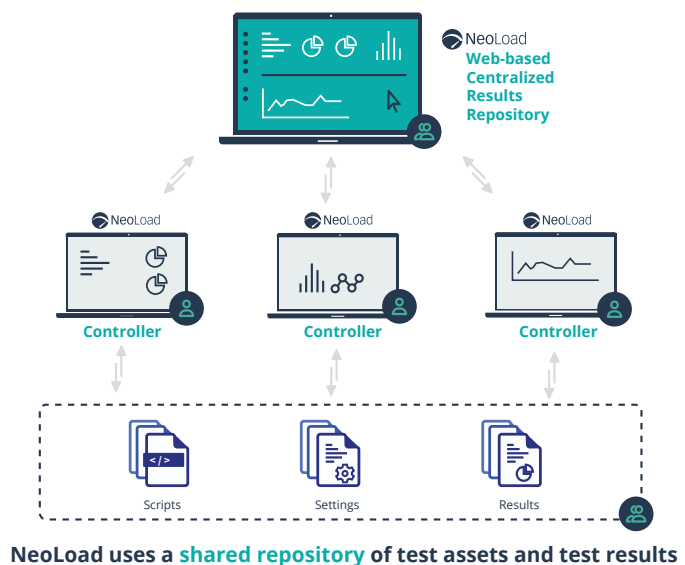

The Business Benefits of Superior App Performance

Brand Reputation ↑ 

Competitive Advantage ↑ 

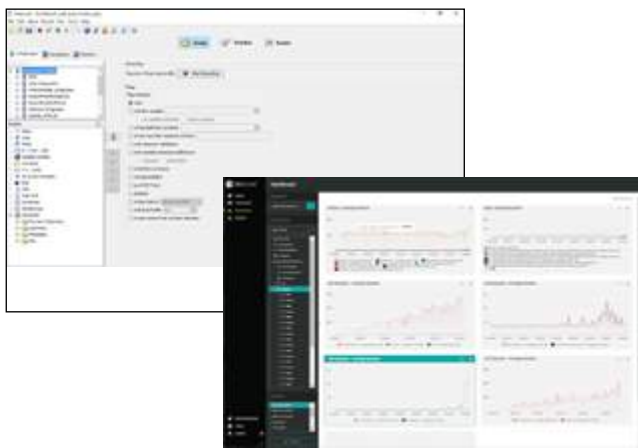

Revenue ↑ 

Customers ↑ 

FAST AND AUTOMATED

Using the scriptless GUI and a host of automation features, NeoLoad lets you design tests 5-10x faster and maintain scripts in as little as 10% of the original design time while helping you automate testing with your Continuous Integration system so you're as agile as your development teams need you to be.

What's in it for you?

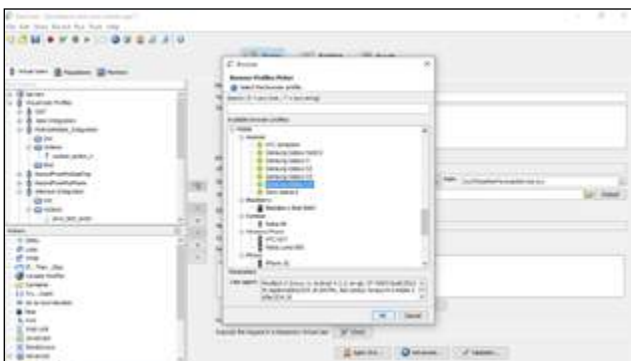

- Design tests 10x faster than with other load testing tools
- Reduce script maintenance by up to 90%
- Flexible, web-based platform with SaaS and on-premises deployment options

How does your organization benefit?

- Meet increasing user demands
- Deliver faster and more frequently
- Release flawlessly, every time

SUPPORTS THE LATEST WEB & MOBILE TECHNOLOGIES

With unparalleled support for WebSocket, Flex, Push, GWT, HTML 5 and many more technologies, NeoLoad provides a full performance testing tool box for web and mobile apps so that you can fully test the technologies your apps have today and be ready for anything your dev team might use tomorrow.

What's in it for you?

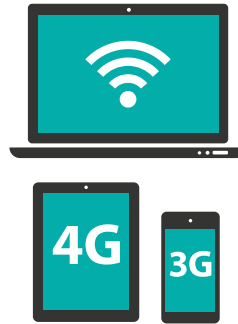

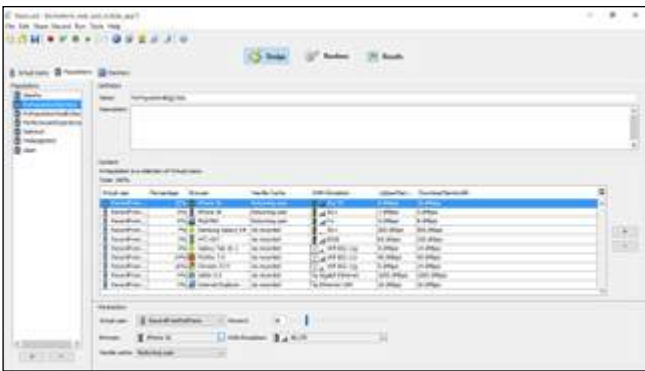

- Test all web and mobile technologies
- Test any device on any network
- Ensure apps are tested under the most realistic conditions

How does your organization benefit?

- Confidently create new experiences for customers
- Ensure performance for users on any device or network

UNMATCHED TEST REALISM

NeoLoad provides the following capabilities to help you create real world testing scenarios so you catch performance problems early, before they show up in production: complex application behavior replay, real device mobile app recording, network virtualization, and real device/browser metrics under load.

What's in it for you?

- Easily pinpoint root cause of performance problems
- Deliver actionable insights to technical teams

How does your organization benefit?

- Resolve problems earlier in application development lifecycle
- Decrease project risks
- Reduce costs

CLOUD AND IN-HOUSE TESTING

Generating load on your on own infrastructure or on-demand from the cloud is easy with the fully integrated Neotys Cloud Platform. Pick from several locations around the globe and from multiple cloud providers through a single interface for geo-realistic tests and pay-as-you-go licensing.

What's in it for you?

- Realistic testing conditions from outside the firewall
- On demand provisioning of infrastructure from multiple geographies
- One stop shop for the leading cloud providers
- Run more tests in parallel

How does your organization benefit?

- Guarantee performance for customers around the globe
- Trade costly capital expenditures for operating expenses

“ Load testing is 6x faster with NeoLoad compared to our legacy tool. ”

- Pascal Auger, Head of Performance Testing, Credit Agricole Technologies & Services

“ NeoLoad reduced our script refactoring time by 90%. ”

- Vibhu Dureha, Software Dev Senior Engineer, Dell

“ NeoLoad enables us to test in one day what used to take five with our previous solution. With NeoLoad, we have reduced our time to market for new features and enhancements for our customers and are able to accurately plan releases in advance. ”

- Andreas Papadopoulos, Head of Software Delivery, Sporting Index

“ With NeoLoad, we have reduced scripting time and script test maintenance by 66%. ”

- Mikey Warner, Head of QA, Office Depot
